

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

How might we predict which patients are most likely to suffer from a heart disease in the near future using the features given?

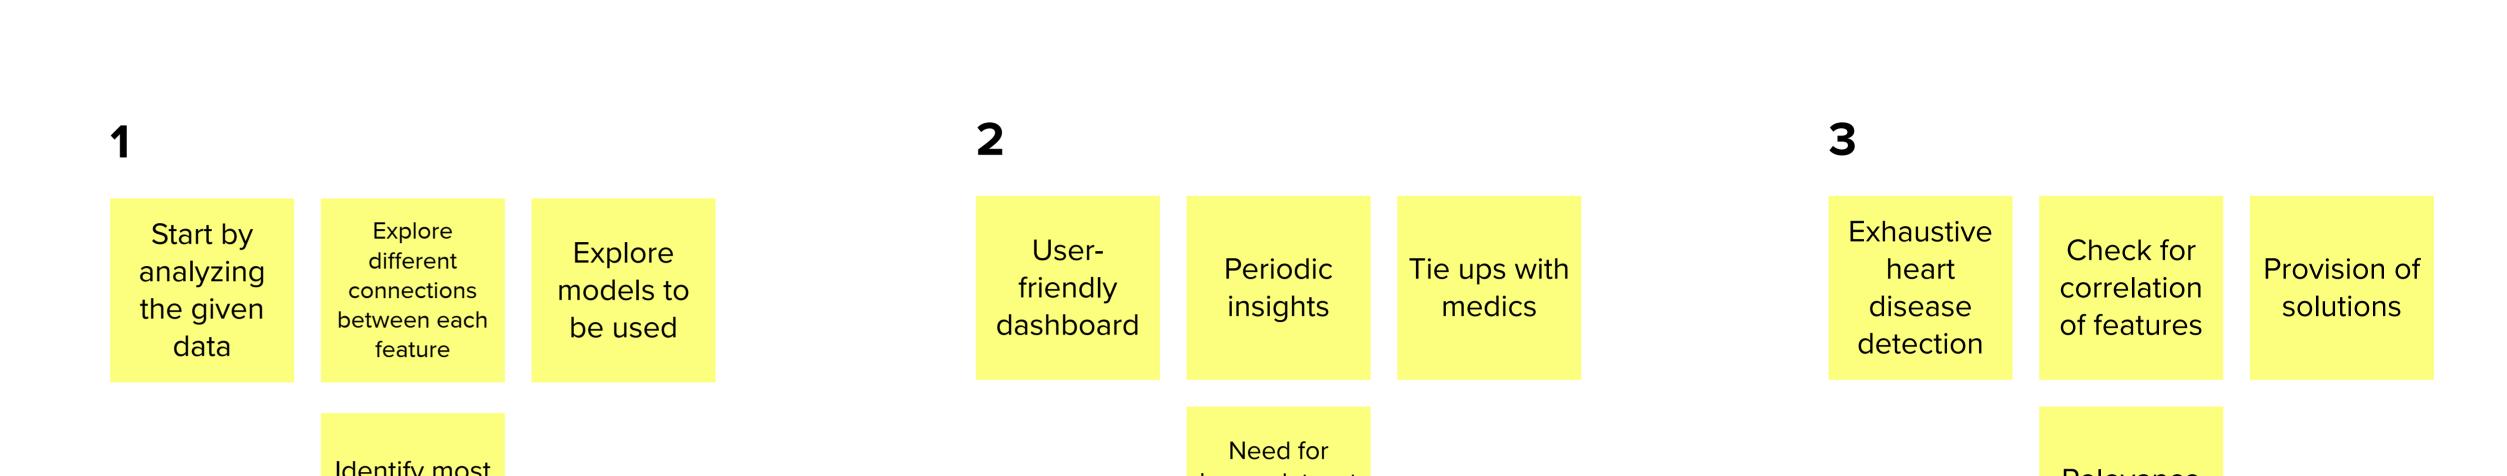

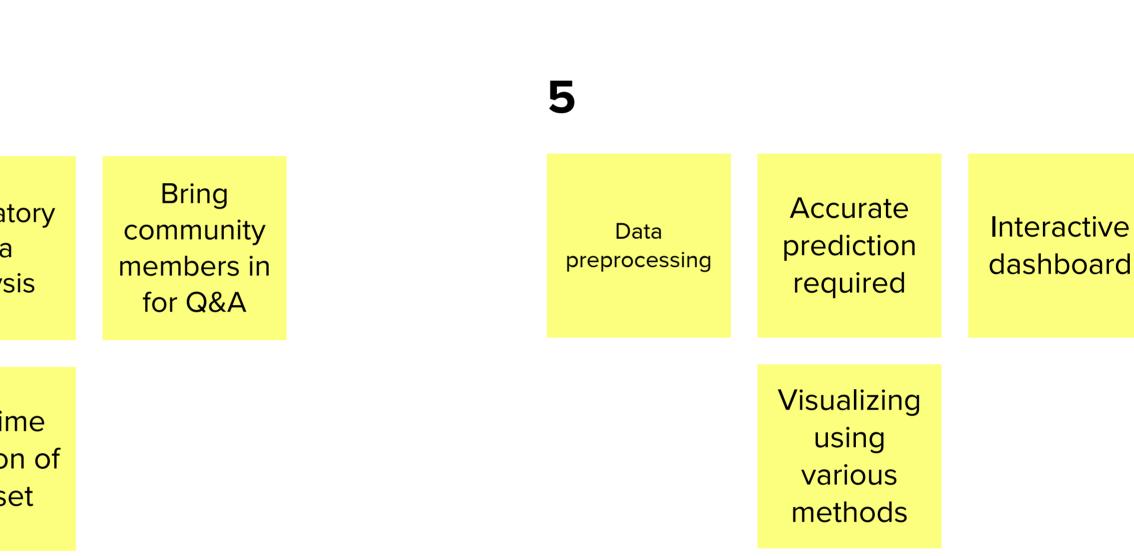

Brainstorm

Write down any ideas that come to mind that address your problem statement.

① 10 minutes

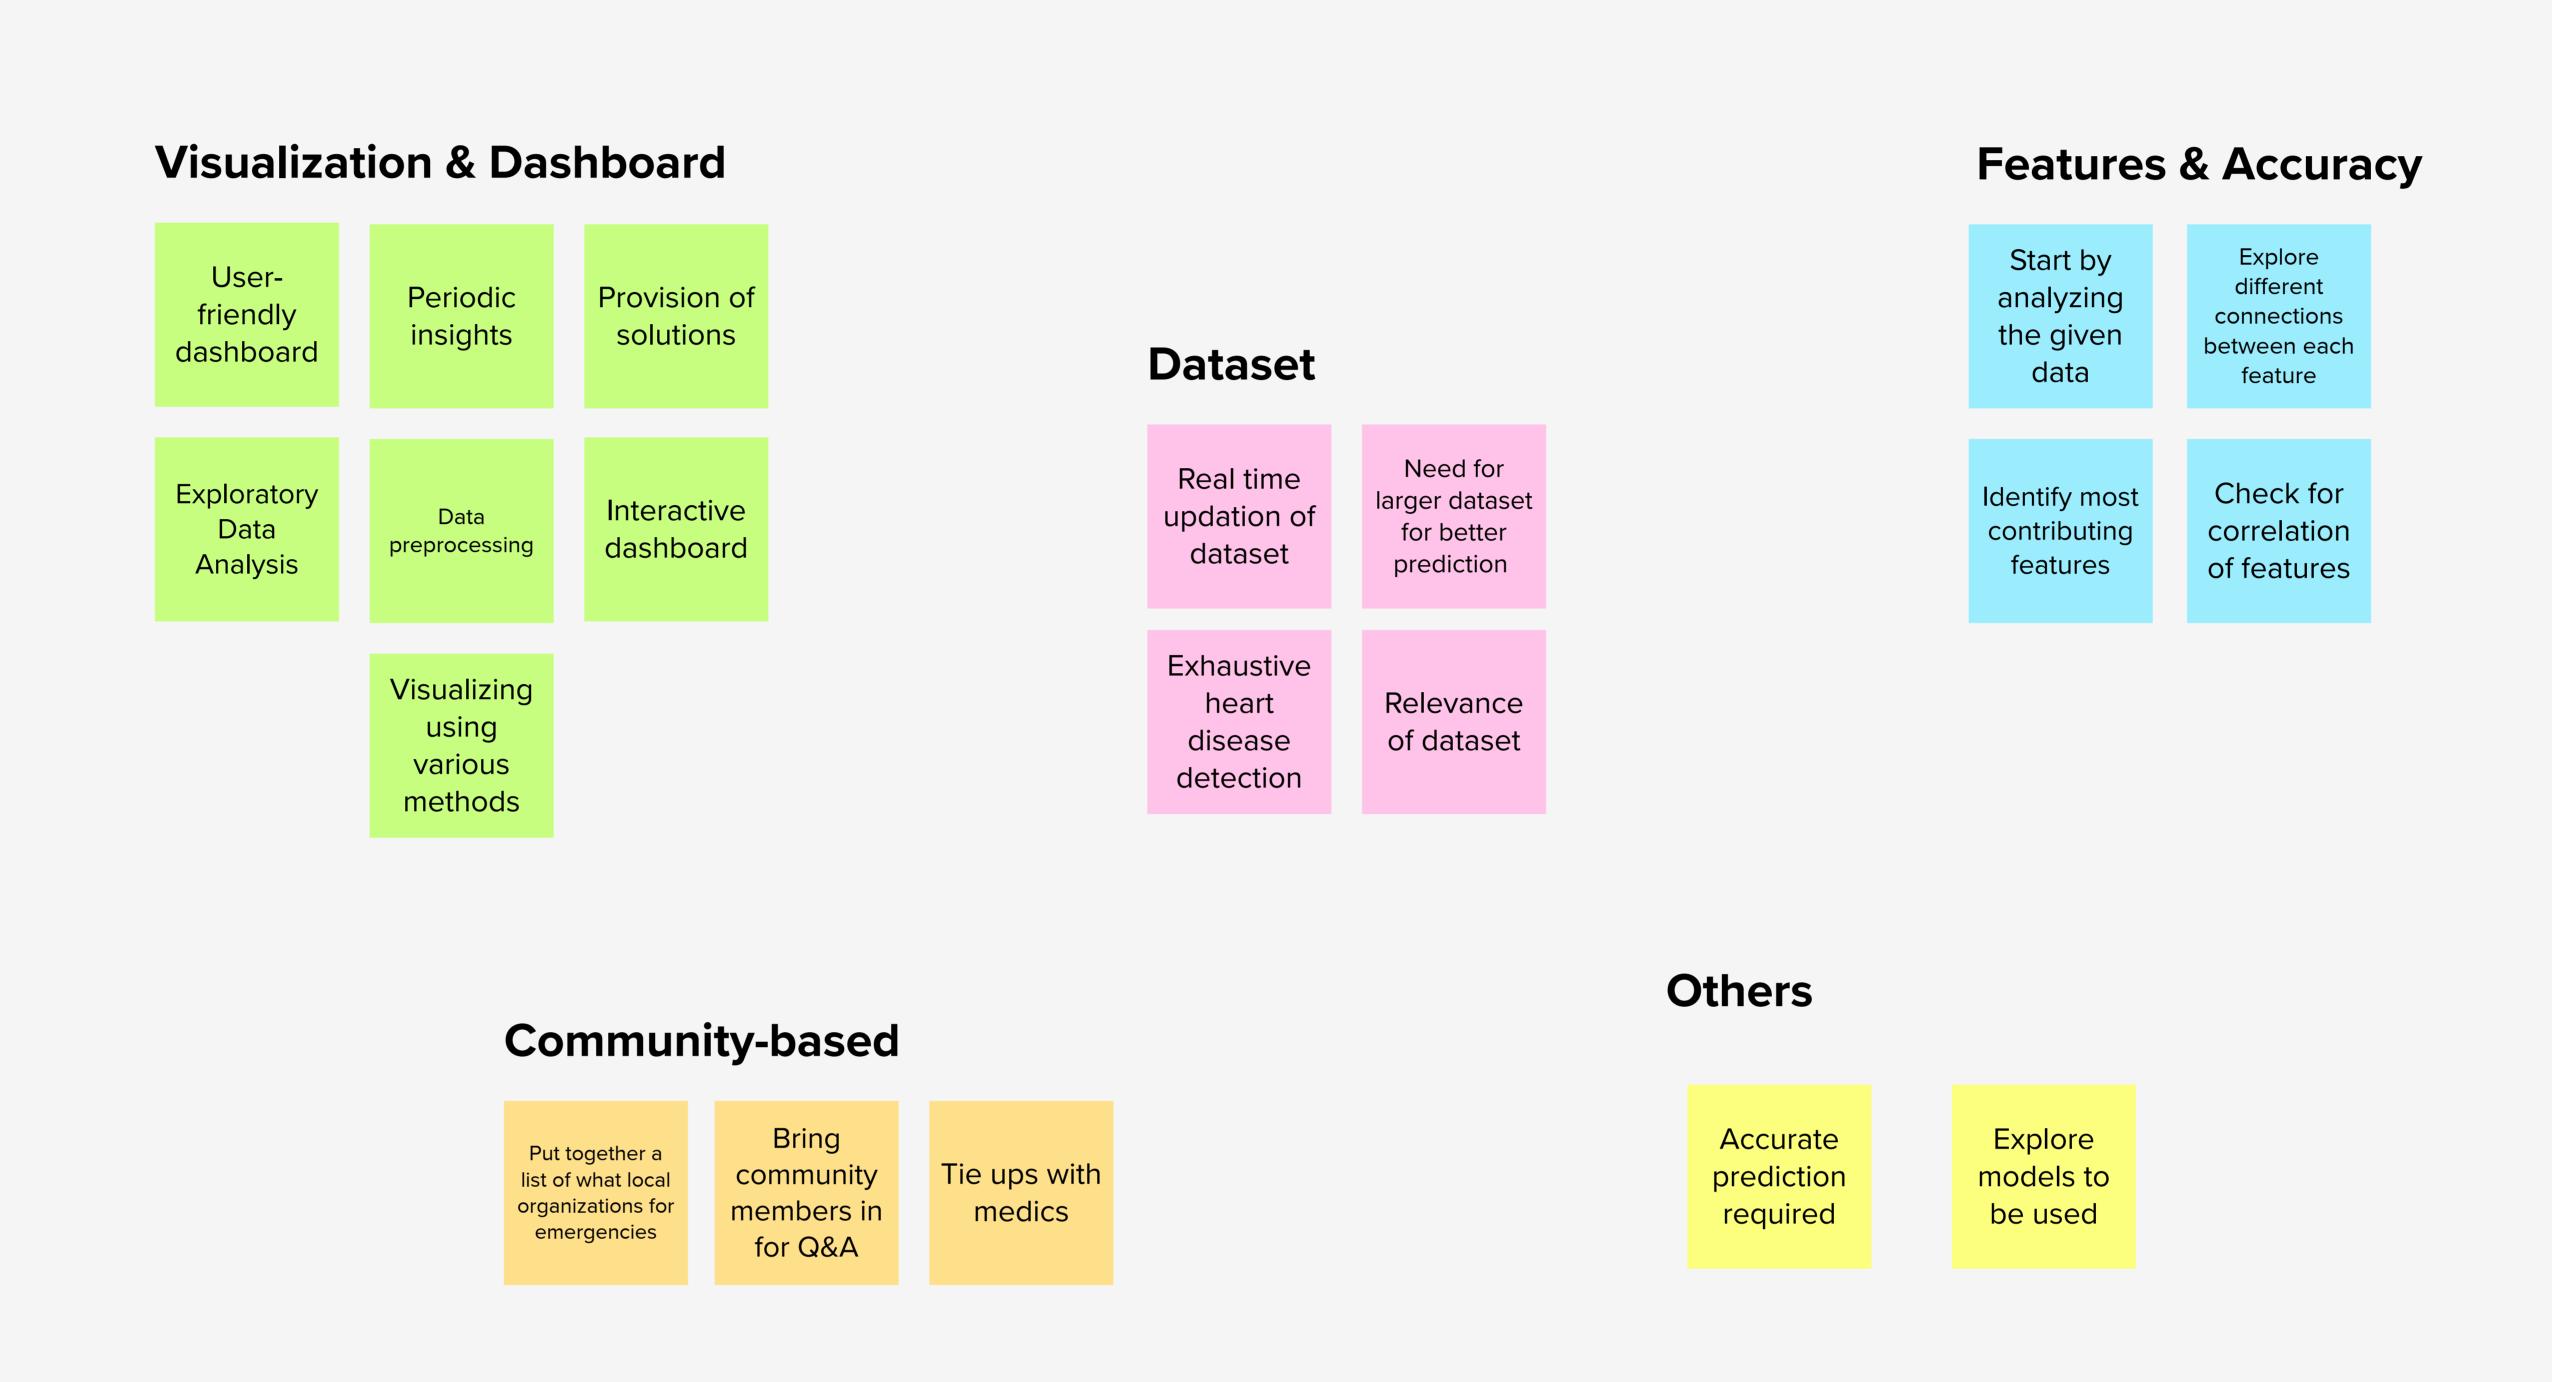

Group ideas

Use this space to group similar ideas from the brainstorm. Each group should have a title that describes what the ideas have in common. If a group is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

① 20 minutes

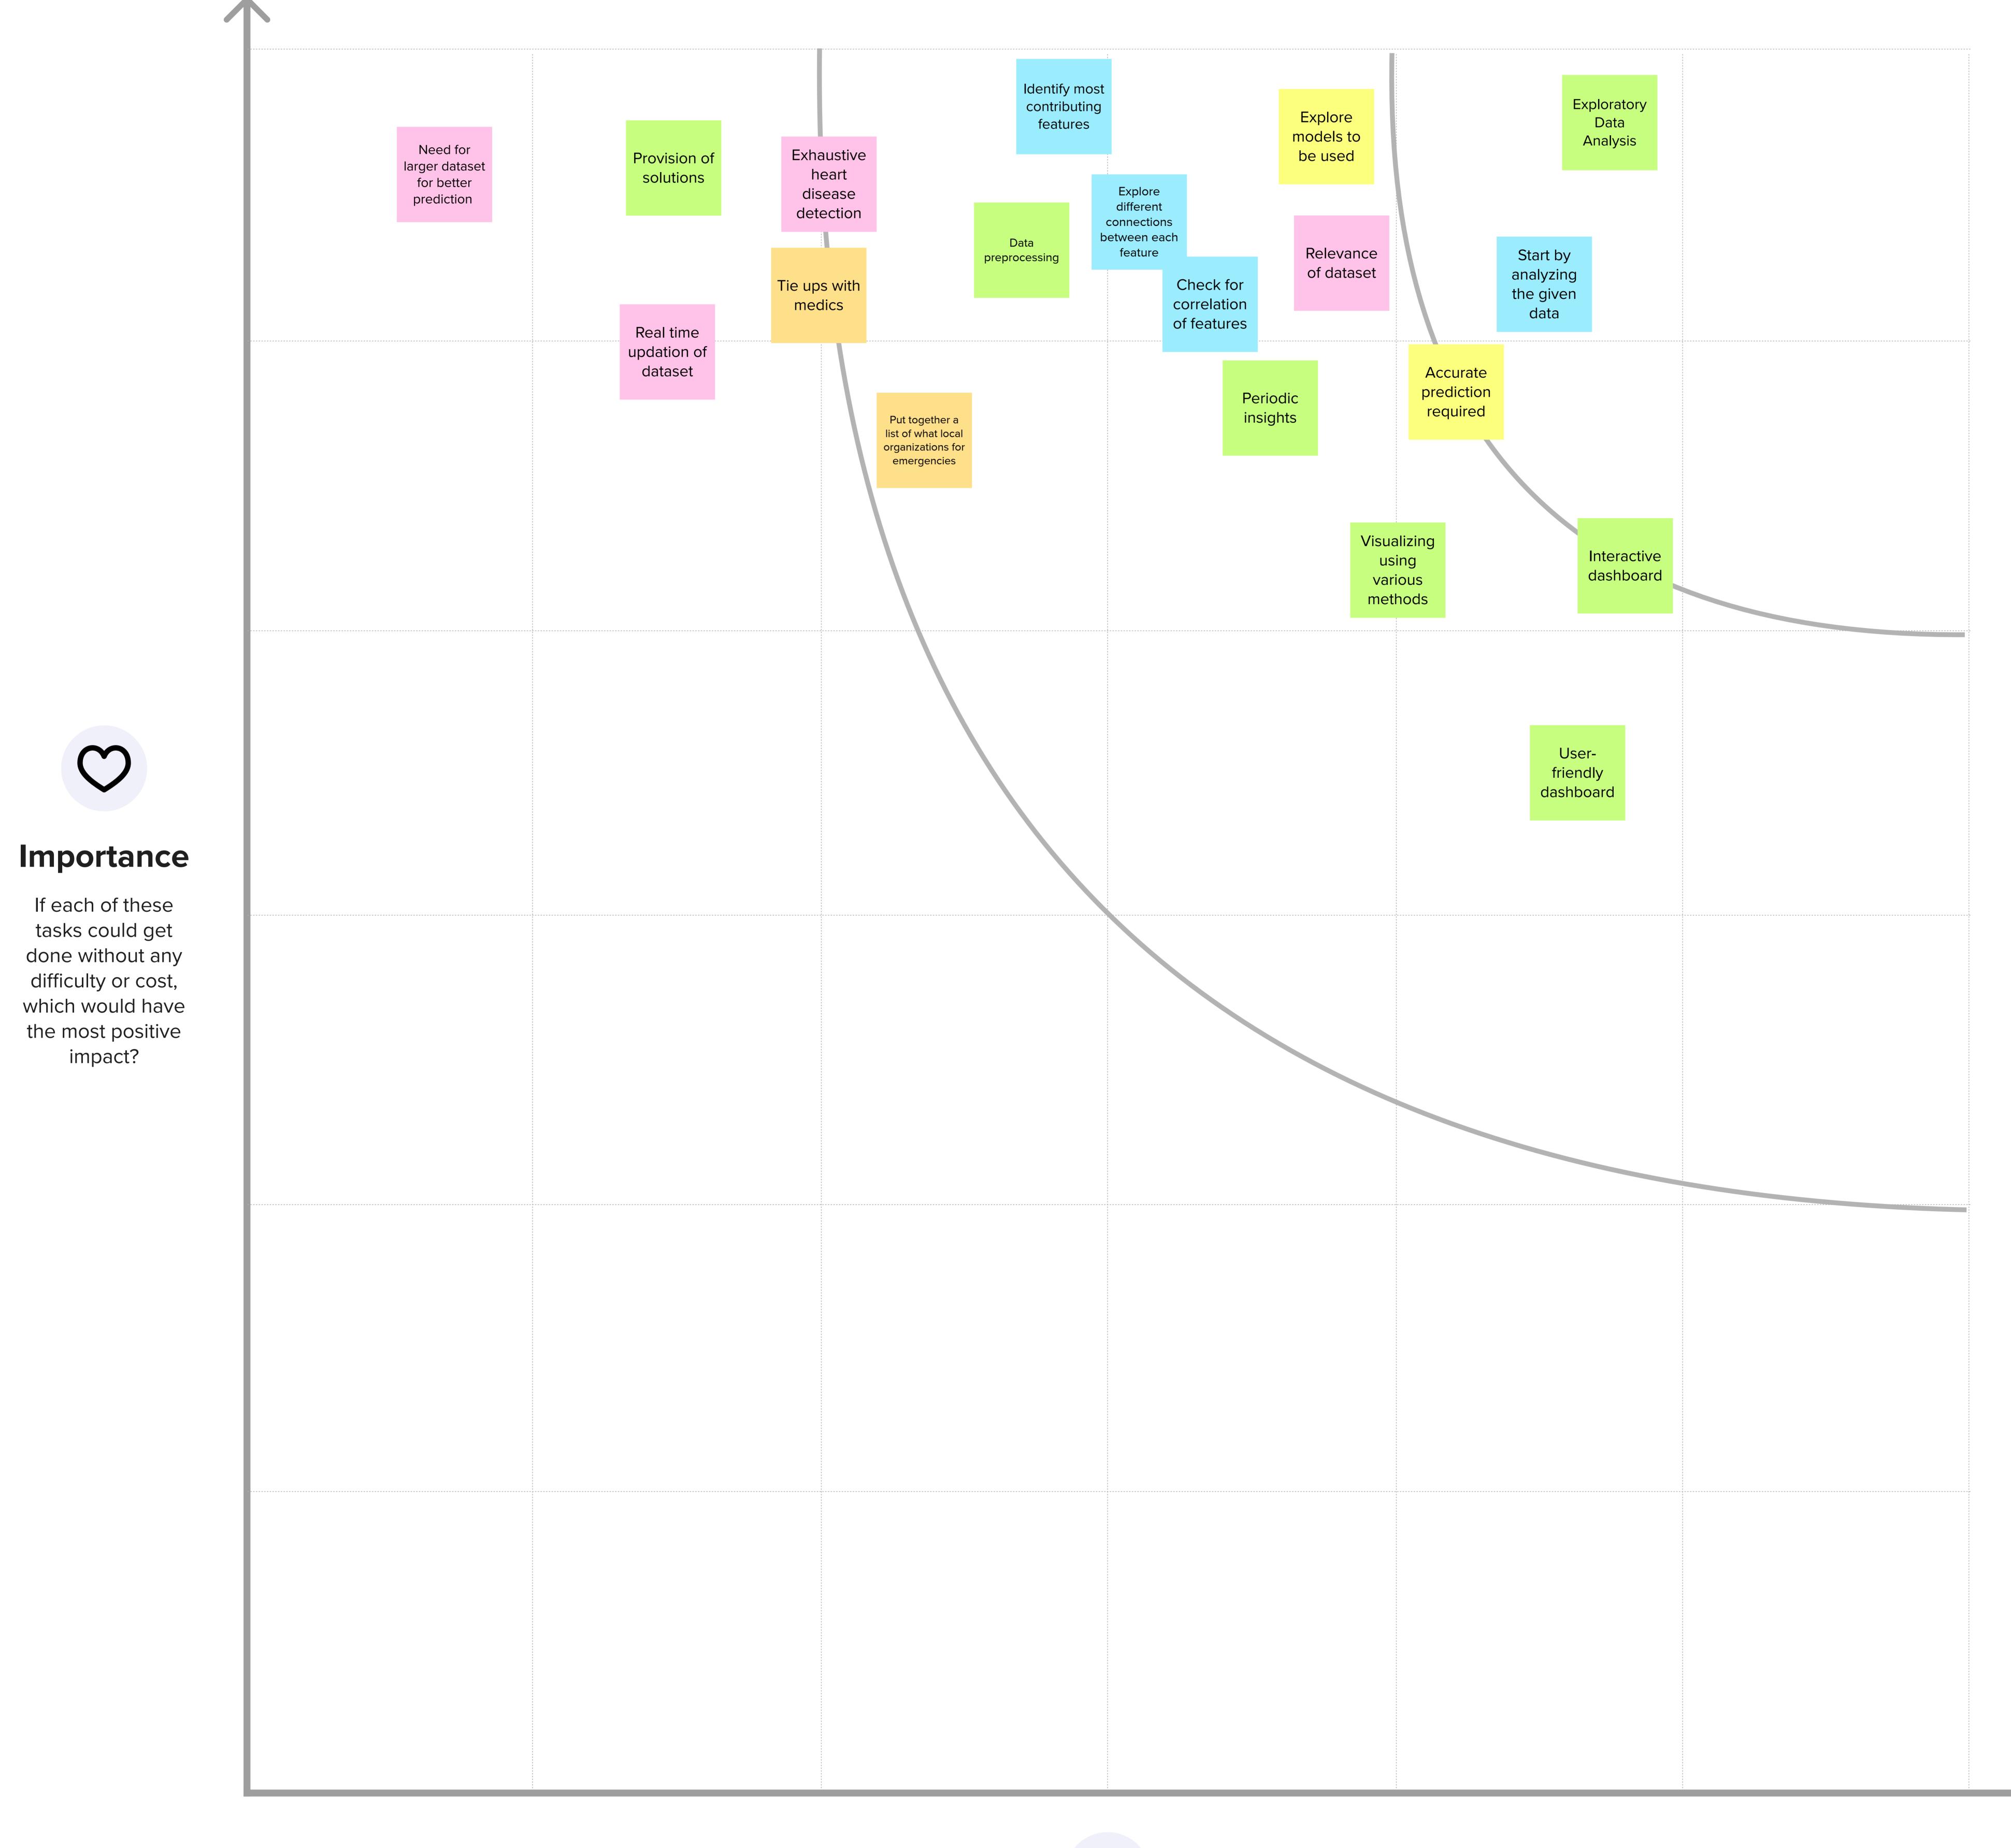

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

Feasabili^{*}

Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)
